

Psyllium Husk *Plantago ovato*

BOTANICAL NAME: Plantago ovato
INGREDIENTS: Psyllium Husk
GRADE: Premium Food Grade
COUNTRY OF ORIGIN: India

Psyllium Husk is a fibre bulking agent, used to stimulate gastrointestinal tract activity to help avoid impaction with faeces or sand. Psyllium Husk absorbs water in the GI tract and expands, thereby increasing the bulk of the faeces, and promoting peristalsis.

If your horse is grazing in dry/drought conditions or is housed in a dry or a sandy yard or paddock, feeding psyllium husk monthly may help to remove sand and dirt from the hindgut.

GENERAL FEEDING GUIDE:

Horse- Maintenance	Maintenance - 125 to 250g for two to five consecutive days added to food or as directed by your veterinarian.
Horse- High risk -	250g for two to five consecutive days added to food or as directed by your veterinarian.
Mix well in slightly dampened feed. To improve palatability, try mixing Psyllium Husk with molasses to make a crumble and spread over feed.	
Dogs and Cats	½ to 1 teaspoon for 10kg bodyweight added to food or as directed by your veterinarian.

Fresh clean drinking water should always be available.

Crooked Lane Harvest products are a range of nutritional supplements for inclusion in animal feed. Listed amounts are a guide only and have been prepared in consultation with a veterinarian with over 40 years of experience in animal health and nutrition and product development. For specific health concerns, always seek advise from a veterinarian or health care professional.

CODE & PACK SIZE: VAL7201 900G
 VAL7203 3.5kg

ALLERGEN STATUS: This product contains no known allergens.

TECHNICAL NOTES

NUTRIENT TABLE

NUTRIENT	AVG QUANTITY per 100g
Energy	125 kj
Protein	3 g
-Gluten	
Fat, total	0.5 g
-saturated	0 g
-polyunsaturated	
-monounsaturated	
Cholesterol	
Carbohydrates	4 g
-sugars	
Dietary fibre, total	0 g
Sodium	80g
Potassium	125 mg

PHYSICAL/ CHEMICAL PROPERTIES:

- a) Colour: Typical of psyllium
- b) Odour: Typical of psyllium
- c) Aroma: Typical of psyllium
- d) Particle Size: 40% min on US 30 MESH
8% max through US 70 MESH
4% max through US 100 MESH
- e) Swell Volume: 36ml/g min
- f) Purity: 98% min purity
- g) Light Extraneous Matter: 2% max
- h) Ash: 4.00%
- i) Moisture 8.5%

STORAGE: Store in a cool, dry area, away from direct sunlight; RH 70% max. Once opened, re-seal pouch to retain freshness and quality.
